Unit 4 - Individual Project (125 points)

Due: Sun, Nov 3 |

Description

Assignment Details:

This week, you will work on the high-level design for the project and detailed design for sprints 1 and 2. You can choose the design approach you see fit for the project.

Update the Project Document (started in Week 1) and add your design to the "Product Design" Section:

- Make sure you create a high-level design for the project.
- Based on the sprint planning you created, initiate the design to help start development in CS492. This can be done using use cases, class diagrams, or/and activity diagrams. You can choose other design approaches/diagrams as you see fit.
- Add your diagrams/ design artifacts to the "Product Design" Section.
- Your design should cover at least 50% of the project scope.
- Your design should cover any security or other nonfunctional concern related to the product.
- Submit the Project Document.

Please submit your assignment.

For assistance with your assignment, please use your textbook and all course resources.

Individual Project Rubric

The Individual Project (IP) Grading Rubric is a scoring tool that represents the performance expectations for the IP. This Individual Project Grading Rubric is divided into components that provide a clear description of what should be included within each component of the IP. It's the roadmap that can help you in the development of your IP.

Expectation	Points Possible	Points Earned	Comments
High Level Design: Level design should be created and added to the project document.	25		
Detailed Design: Detailed design for sprints 1 and 2 items should be created.	30		
Design Coverage: The design artifacts should cover at least 50% of the product scope.	25		

Security Concerns: Security concerns should be addressed.	20		
Organization: Assignment presents information logically and is clearly relevant to discussion topic.	15		
Professional Language: Assignment contains accurate grammar, spelling, and/or punctuation with few or no errors. (APA formatting is required or style specified in assignment).	10		
Total Points	125
